

# SENJA LOUNGER

STUDIO SEGERS

## DESCRIPTION

Ultimate comfort is the essence of the Senja lounger. The voluminous cushions ease away any stress and an optional full-length teak side table keeps everything close to hand. The extra-soft, weather-proof cushion, adorned with a ton-sur-ton piping and supported by Batyline, is combined with a powdercoated aluminium frame, which makes the Senja lounger as durable as it is indulgently relaxing.

## MATERIALS

- Frame: powdercoated aluminium
- Seat: Batyline®
- Optional side table: plantation teak from East-Java
- Hardware: 316L electropolished stainless steel

## CUSHIONS

All our cushions are weatherproof, which means you can leave them outside, even during short periods of rain. The filling has a cover in laminated, water-repellent polypropylene and the thread used to stitch the seams swells when getting wet, preventing water from penetrating through the seams. As an extra precaution, the seams are protected on the inside with an extra covering. Fabrics are available in category D, E & F. The cushion has a piping in the same fabric colour.

## COLOURS

00-White

10-Linen

## PROTECTION COVERS

Covers are available that protect your sofa against dirt. These covers in grey colour are made of PU coated polyester which is water-repellent and UV-resistant. Thanks to their excellent breathable qualities the covers reduce condensation and heat build-up, helping to prevent the formation of mold and mildew. Always make sure that furniture, cushions and covers are completely dry before covering furniture.

## MAINTENANCE

### Frame

Clean the aluminium frame with tap water and a PH neutral soap. For stubborn stains, use Aluminium Cleaner. We advise to use Teflon® Protector twice a year which applies an invisible film and protects the aluminium against the adhesion of dirt.

Teflon® Protector  
(spray that lays an invisible dirt-repellent film)

### Seat

The Batyline seat can be cleaned with soap and water. For stubborn stains use Synthetics Super Cleaner. Apply with a soft brush on both sides. Leave to soak for a while and rinse with a garden hose.

Super Cleaner

### Teak side table

Treat new teak with Teak Protector 4 à 6 weeks after installation. Teak Protector applies an invisible film that prevents stains and green deposit. Soiled teak can be cleaned with Teak Super Cleaner. Leave the furniture to dry completely and then apply Teak Protector. To avoid labour-intensive cleaning, you can treat the wood with Teak Sealer. A simple cleaning with water and a ph-neutral soap will do for many years. Teak Sealer contains UV protection to slow down the graying from the sun as well as a fungicide to prevent the growth of mold and mildew.
