

GRUPPO NOTTE
CHEST OF DRAWERS

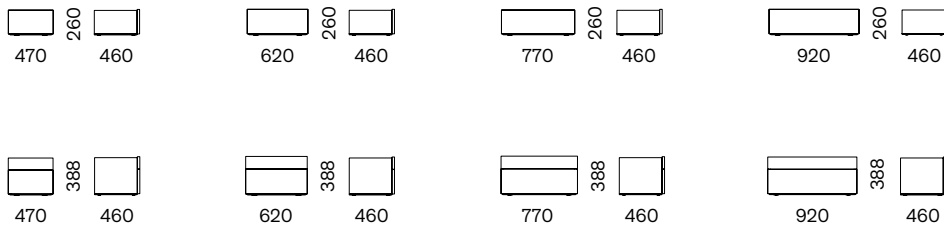

INTERNO / INDOOR

I fianchi e i piani dei comodini, dei settimanali e dei cassettoni vengono uniti a 45°, tramite giunzioni angolari a scomparsa. Per garantire una maggiore portata, i fianchi esterni poggiano su uno scuretto H 10 mm ricavato nel fondo. I frontali sbordano di 10 mm nella parte superiore e laterale della struttura permettendone così l'apertura.

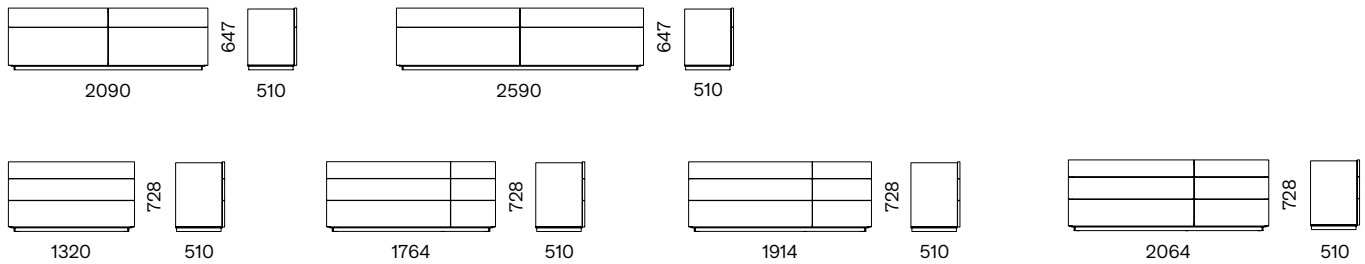

Tops and sides of the bed-side tables, chest of drawers and dressers are adjoined at 45° by means of recessed angular joints. For more load-bearing, the external finishing sides rest on a groove H 10 mm machined out from the bottom. Frontals overlap by 10 mm on upper and lateral sides of structure thus enabling opening.
